Glycolic Peel

This procedure is designed to resurface and retexture facial skin.

Glycolic Acid dissolves the "glue like" substance in the stratum corneum allowing the outer dead layers to lift away without wounding the skin. Results can be dramatic decreasing the appearance of fine lines and improving skin texture. Your skin will appear firmer, brighter, more translucent, supple and soft. There is no recovery period and very little redness. You can apply make-up immediately and resume normal activity.
